

# Rotary Drum

The Scott Rotary Drum Mixer is ideal for fast, efficient mixing of heavy, free-flowing materials. The forward/reverse rotation of the drum, angled baffle plates, and optional swing inlet-discharge door assures virtually a 100 percent product discharge.

- Manufactured in carbon steel or stainless steel, with the option of standard or food grade finishes
- Bearings and seals do not come in direct contact with the material making for easy cleaning
- Special guards over trunnion wheels insure greater safety while mixer is in operation
- Complete cleanout eliminates contamination
- Easy maintenance of all shafts and bearings
- There are no augers or ribbons to become coated and bind as a result of condensation inside the mixer
