

Tender Blend

The Scott Tender Blend is a continuous process mixer that is designed to mix products with larger particle sizes such as pellets, flakes, whole or textured grains. The Tender Blend delicately processes materials which must be mixed and not damaged during the process. This mixer is also ideal for combining liquids with coarse products using a liquid addition system.

- Provides continuous mixer with low agitation on the product to minimize degradation
- Available in carbon steel, stainless steel and a variety of other materials of construction including food-grade
- Gentle mixing of two to six ingredients with liquid addition ports available for coating applications
- UHMW liners as well as heating or cooling jackets are optional
- Ribbon/Paddle design encourages forward and delicate processing motion
- Paddle/Paddle design offers an even gentler mixing of products
- Adjustable paddle impede forward motion for maximum product mixture
