

Twin Shaft Mixer

- Consistent CV's of 3-6%
- Mix times as low as 30 seconds
- Ribbon/Paddle Design engineered specifically for Twin Shaft Mixer
- Able to mix down to 10% of rated capacity
- Low profile design for ease of installation into existing facilities
- Capacities from .1 - 42 cubic meters
- 10 year warranty on main shaft

*Your Global Equipment Supplier
for the Feed Industry*

SCOTT TENDER BLEND CONTINUOUS MIXER

- This mixer is designed to continuously mix delicate products, such as texturized animal feeds, with **minimal product degradation**. The unique design on the agitator protects the integrity of the product during the mixing process.
- The Tender Blend's design, in association with the speed of the mixer, allows for a range of retention times to meet a product's specific requirements. The Tender Blend is available with complete liquid addition.

SCOTT BATCH MIXERS

- The enhanced agitator with close wrapped ribbon and the high efficiency tub design provide an **efficient, balanced mixing action yielding cycle times as low as 90 seconds**. In addition to the ribbon agitator, paddle / ribbon and paddle / paddle agitators are available to meet specific mixing needs.
- Scott Surge Hoppers **provide fast, efficient clean-out**. The Scott Surge Hopper is available with either a paddle drag or screw conveyor for discharge, will accommodate the entire batch mixer and can be equipped with the Scott invented curved section for inclines up to 45 degrees.
